

Bollettino pollini
Stazione: AN1-ANCONA

Commento settimanale: Mese: luglio Periodo: 7.1 Dal: 08/07/2019 Al: 14/07/2019

Le giornate di pioggia di questa settimana hanno ridotto notevolmente la concentrazione dell'aerosol biologico in modo particolare si segnala la diminuzione dei pollini di Plantaginaceae e Graminaceae ed Urticaceae. Diminuzione meno spiccata per i pollini di castagno e stazionaria e a bassi livelli quelli di Oleaceae.

Previsioni dal 15.07.2019 al 21.07.2019

Non si prevedono variazioni significative dello spettro pollinico rispetto alla situazione attuale.

Bollettino spore
Stazione: AN1-ANCONA

Commento settimanale: Mese: luglio Periodo: 7.1 Dal: 08/07/2019 Al: 14/07/2019

Livelli mediamente significativi per le spore fungine di Alternaria, a livelli inferiori tutte le altre spore.

Previsioni dal 08.07.2019 al 14.07.2019

In condizioni meteo favorevoli con elevate temperature ed umidità potrebbero aumentare le spore fungine di Alternaria e tutte le altre spore.
